

# CALIFORNIA TB 117-2013 WITH CHEMICAL STATEMENT

Note: Law Label is not to scale

California also has additional flammability regulations that may apply in certain situations, such as furniture used in a public setting. Refer to <https://bhgs.dca.ca.gov/> to ensure that you are compliant.

This specific "flame retardant chemical statement" must follow the TB117-2013 flammability label verbiage.

- The minimum label size requirement for the flammability label with the chemical statement is 2 x 3 inches.
- The minimum size of type shall be 1/8 inch in height and type shall be in capital letters for the TB117-2013 section.
- The chemical statement does not need to be in all capital letters.
- That said, the 1/8 inch height is measured from the lowest case letter, as such, we have made this sample to be all caps to meet the 1/8 inch measurement to meet that requirement.
- Please note that not all 9 point fonts fit this criteria.
- The chemical statement must be located to the right or at the bottom of the compliant flammability section of the label;

Either way, it may be separated by a black line. The statement cannot be located to the left or top of the compliant flammability label.
